COMPLAINT

SUBJECT

PART NUMBERS

Incorrect part numbers have been quoted on several recent orders submitted to our Spares Department; investigation of these orders has shown that the part numbers used were taken directly from the components in question and not from the Spare Parts List.

A warning therefore appears necessary against the use of any number or identification marking stamped, moulded or engraved on an individual part; such numbers are not recognised by the Spares Department, but appear only for manufacturing purposes.

When ordering spare parts, ALWAYS QUOTE PART NUMBERS TAKEN FROM THE CORRECT SPARE PARTS LIST, otherwise delay and the despatch of wrong components are liable to result.

This sheet replaces that already in your file which bears the SAME bulletin and sheet numbers, but of a LOWER issue number. The old copy should be removed and destroyed.
