ROVER SERVICE BULLETINS, 1948

Dear Sirs,

We are enclosing with this letter the first of our series of Service Bulletins for 1948 models. As in the past, they will not be issued at regular intervals, but rather as and when the necessity arises.

Each bulletin will be identified by a serial number, commencing at 5001 ; indication is also made of the unit or aspect affected, e.g., Specification, Engine, Lubrication, etc. Bulletins may therefore be filed in either numerical order of serial numbers or in alphabetical order of units affected. It is suggested that the latter method be adopted, as it will then facilitate the location of bulletins on a certain subject, which is the normal information desired.

It will be noticed that each bulletin sheet bears an issue number ; a re-issued page will bear a higher issue number and should be filed to replace the copy originally circulated, which can then be removed from your file and destroyed.

It is our desire that the fullest technical information shall be imparted to our agents and we shall welcome any comments or suggestions from them.

Yours faithfully,

Technical Service Manager,
THE ROVER CO. LTD.
